

## Content

Course Code	Course Name	Semester	Theory	Practice	Lab	Credit	ECTS
INF444	Artificial Intelligence	7	3	0	0	3	5

Prerequisites	INF223
Admission Requirements	INF223

Language of Instruction	
Course Type	Compulsory
Course Level	Bachelor Degree
Objective	This course is an introduction to artificial intelligence and its applications. The objective of the course is to introduce the fundamental methods and approaches to define, formalize and solve AI problems through simple examples and applications.
Content	<ol style="list-style-type: none"><li>1. Intro to AI</li><li>2. Intelligent agents and environments</li><li>3. Problem formalization</li><li>4. Introduction to search algorithms</li><li>5. Uninformed search algorithms</li><li>6. Informed search algorithms</li><li>7. Adversarial search and game theory</li><li>8. Constraint satisfaction problems</li><li>9. Intro to knowledge, reasoning and planning</li><li>10. Propositional logic</li><li>11. First-order logic</li><li>12. Neurons and artificial neural networks</li><li>13. Uncertainty and probabilistic approaches</li><li>14. Project presentations</li></ol>

## Theory Topics

Week	Weekly Contents
1	Intro to AI
2	Intelligent agents and environments
3	Problem formalization
4	Introduction to search algorithms
5	Uninformed search algorithms
6	Informed search algorithms
7	Adversarial search and game theory
8	Constraint satisfaction problems
9	Intro to knowledge, reasoning and planning
10	Propositional logic
11	First-order logic
12	Neurons and artificial neural networks
13	Uncertainty and probabilistic approaches
14	Project presentations
