ECON407	Economics of information and uncertainty	7	3	0	0	3	6

Prerequisites	
Admission Requirements	

Language of Instruction	French
Course Type	Elective
Course Level	Bachelor Degree
Objective	The objective of this course is to introduce students to the role of information in economics.
Content	This course introduces two new aspects of the decision of economic agents following Microeconomics 1 and 2 courses: taking into account of uncertainty and information in decisions and markets. The course provides an introduction to the methods and models of finance, game theory and contracts. We start with an introduction to decision making in uncertainty. We then move on to the principal agent theory. This is a theoretical course with applications in finance and insurance sector.
