COM435	Digital Game Design	7	3	0	0	3	3

Prerequisites	
Admission Requirements	

Language of Instruction	English
Course Type	Elective
Course Level	Bachelor Degree
Objective	In this course, where the concept of game and player experience will be examined in detail, students will gain knowledge in the field of game experience and basic game design concepts. In addition, the usability principles in games that the students can benefit from in the design processes will also be taught and applied.
Content	The course will provide students with an introductory knowledge of the field by bringing a fundamental approach to the existing playground. In addition, beyond the basic concepts, the field of player psychology will be mentioned, and how games create experiences will be analyzed theoretically and practically. This course teaches students the fundamentals of game psychology and fundamental concepts such as cognitive abilities, memory, and attention. It also includes game-oriented topics such as attachment theories, entertainment, user experience, game experience, game heuristic effects, gamification, and flow theory.

Theory Topics

Week	Weekly Contents
1	Introductory Course – Introduction to the course materials
2	Inspecting the play
3	Inspecting the game
4	Game elements and mechanics

Week	Weekly Contents
5	Psychology and Games I (Perception)
6	Psychology and Games II (Memory)
7	Psychology and Games III (Attention)
8	Psychology and Games IV (Motivation)
9	Psychology and Games V (Emotion)
10	Presentation Week
11	Hero's Journey and Player Journey
12	The field of HCI, User Experience & Usability
13	Player Experience (PX)
14	Final Project
