Course Code	Course Name	Semester	Theory	Practice	Lab	Credit	ECTS
INF365	Information Theory	6	3	0	0	3	4

Prerequisites	
Admission Requirements	

Language of Instruction	French
Course Type	Elective
Course Level	Bachelor Degree
Objective	<ul style="list-style-type: none"><li>• The description of the models for the algorithmic reasoning of information flow,</li><li>• The study of the effects of theoretical information models on current applications,</li><li>• The reasoning of theoretical background of data structures through different scales,</li><li>• Information coding, compression, channel capacity, information flow and related studies, consist the main concepts of the course.</li></ul>
Content	<ul style="list-style-type: none"><li>1.Week Algorithmic Complexity</li><li>2.Week P-NP Completeness</li><li>3.Week Information and Entropy</li><li>4.Week Relative Entropy, Mutual Information</li><li>5.Week Shannon's Effect</li><li>6.Week Compression Theory</li><li>7.Week Compression Algorithms</li><li>8.Week Midterm</li><li>9.Week Channel Capacity</li><li>10.Week Universal Source Coding</li><li>11.Week Lempel-Ziv Coding</li><li>12.Week Network Information Theory</li><li>13.Week Information Theory Inequalities</li><li>14.Week Statistical Techniques</li></ul>
References	<ul style="list-style-type: none"><li>1-Elements of Information Theory, Second Edition, Thomas M. Cover, Joy A. Thomas, Wiley-Interscience, 2006</li><li>2-Computational Complexity, S. Arora, B. Barak, Cambridge University Press, 2009</li></ul>
