## Content

Course Code	Course Name	Semester	Theory	Practice	Lab	Credit	ECTS
INF402	Introduction to the Internet of Things	7	2	0	2	3	3

Prerequisites	
Admission Requirements	

Language of Instruction	French	
Course Type	Compulsory	
Course Level	Bachelor Degree	
Objective	<ol> <li>Managing and analyzing data produced by IoT systems</li> <li>architecture of embedded processors and how to design and build them</li> <li>design and optimization of wireless communication systems using machine learning techniques</li> <li>modern cryptography applications</li> <li>signal processing and computer vision</li> </ol>	
Content	5. signal processing and computer vision  Fundamentals of Embedded IoT Systems Embedded Computing Methods IoT Networks Research Methods and Project Preparation IoT Device Management Secure Hardware and Embedded Devices Embedded Processors Sensor Fusion Technique IoT Applications in Industry Sensor Based Health Applications Smart Agriculture Applications Applied Internet of Things - Internet of Vehicles and Applications Embedded Machine Learning Algorithms	
References		

## **Theory Topics**

Week	Weekly Contents	
1	Fundamentals of Embedded IoT Systems	
2	Embedded Computing Methods	
3	IoT Networks	
4	Research Methods and Project Preparation	
5	IoT Device Management	
6	Secure Hardware and Embedded Devices	
7	Embedded Processors	
8	Midterm	
9	Sensor Fusion Technique	
10	IoT Applications in Industry	
11	Sensor Based Health Applications	
12	Smart Agriculture Applications	

Week	Weekly Contents	
13	Applied Internet of Things - Internet of Vehicles and Applications	
14	Embedded Machine Learning Algorithms
