SP493	Political ecology	5	3	0	0	3	6

Prerequisites	
Admission Requirements	

Language of Instruction	English
Course Type	Elective
Course Level	Bachelor Degree
Objective	This course examines the relationship between society and the environment from critical and Marxist perspectives. It explores how power, politics, and ideology shape the ways in which people interact with nature and how these interactions affect both social and ecological systems. The course also focuses on the unequal distribution of environmental risks and benefits, the role of the state, and social movements in environmental governance.
Content	Overall, the course aims to provide students with a critical understanding of the relationship between society and the environment, and to equip them with the knowledge and skills to engage in environmental politics and advocacy from a critical perspective.

Theory Topics

Week	Weekly Contents
1	Introduction to the Course
2	Introduction to Political Ecology and Key Concepts
3	Critical and Marxist Perspectives on Nature and Society
4	The Anthropocene and the Environmental Crisis
5	Environmental Resistance
6	Environmental Governance and the State
7	(Post-)Politics of the Environment
8	Environmental Justice, Class, Race and Gender
9	Political Ecology of Energy and Extractivism
10	Political Ecology of Food and Hunger: Inequalities in Production, Distribution, and Consumption

Week	Weekly Contents
11	Political Ecology of Waste Management: Capital Accumulation, Dispossession, (Un)sustainable Development
12	Field Trip (Location TBA)
13	Presentations
14	Conclusion and synthesis
