RI459	European Union as a Global Actor for Sustainability and Resilience	5	3	3	0	3	5

Prerequisites	
Admission Requirements	

Language of Instruction	English
Course Type	Elective
Course Level	Bachelor Degree
Objective	This course presents a comprehensive exploration of the European Union's pivotal role in promoting sustainability and resilience through a global public goods approach to global governance. Through engaging weekly themes, students will explore the complex intersections between EU policies and the United Nations Sustainable Development Goals. The course will address sustainability as a global governance priority across its various dimensions, including economic development, the environment, international security, and peace. EU policies on the circular economy, regional development, agriculture, technology, industry, investment, and trade will be analysed in terms of socio-economic resilience and sustainability. The course will critically assess the potential impact of EU initiatives on enhancing resilience in the face of challenges such as the climate crisis, digital transformation, food security, inequalities, and pandemics.
Content	This course is part of the Jean Monnet Chair in Migration Governance for Sustainability and Resilience (MIGOSUR) and is supported by the Erasmus+ Programme of the European Union. The course explores the European Union’s critical role in fostering sustainability and resilience within a global public goods framework. The course covers key EU initiatives, including the European Green Deal, industrial policy, and trade agreements, assessing their impacts on global governance challenges like climate change, food security, and socio-economic inequalities.
