G317	Basics of Business Data	5	3	0	0	3	5

Prerequisites	
Admission Requirements	

Language of Instruction	English
Course Type	Elective
Course Level	Bachelor Degree

Objective	The aim of this course is to introduce students to the fundamental concepts and applications of business data in organizational decision-making processes. It provides a foundational understanding of data collection, storage, cleaning, analysis, and interpretation, with a strong emphasis on ethical considerations and real-world applications. The course also aims to develop students' data literacy and analytical thinking skills, equipping them to approach data-driven problems in modern business environments with confidence.
