

## Content

Course Code	Course Name	Semester	Theory	Practice	Lab	Credit	ECTS
INF354	Game Theory and Applications in Informatics	5	3	0	0	3	5

Prerequisites	
Admission Requirements	

Language of Instruction	French
Course Type	Elective
Course Level	Bachelor Degree
Objective	<ol style="list-style-type: none"> <li>1. To find win strategies for game trees</li> <li>2. Learning zero-sum games</li> <li>3. Be able to model and solve some real life problems within the framework of game theory</li> <li>4. Be able to examine non-zero-sum games at basic level</li> </ol>
Content	<p>Week 1: Modeling some problems using game trees</p> <p>Week 2: Determination of winning strategies for game trees</p> <p>Week 3: Zero-sum games for 2 players, strategy, gain matrix and modeling</p> <p>Week 4: Minimax principle and instability in minimax strategies</p> <p>Week 5: Features of max and min operators, modeling and solving of different game examples</p> <p>Week 6: Minimax theorem, solution of 2x2 games</p> <p>Week 7: Geometric solution of 2x2 games</p> <p>Week 8: Midterm exam</p> <p>Week 9: Calculation of game value in 2x2 games</p> <p>Week 10: Examination of 2xm games, solution of nxm games</p> <p>Week 11: Linear programming</p> <p>Week 12: Iteration method for the solution of nxm games</p> <p>Week 13: Introduction to non-zero sum games</p> <p>Week 14: Nash equilibrium</p>
References	<ol style="list-style-type: none"> <li>1. Oyun Teorisi, Prof. Dr. Hüsamettin Bakoğlu, Ege Üniversitesi Basımevi, 1991.</li> <li>2. Oyun Teorisine Giriş, Doç. Dr. Ayhan Toraman, İT.Ü. Rektörlüğü Offset Atölyesi, 1982.</li> <li>3. Oyun Teorisi ve J. Nash Dengesi, Ali Koyuncu, 2009.</li> </ol>

## Theory Topics

Week	Weekly Contents
1	Modeling some problems using game trees
2	Determination of winning strategies for game trees
3	Zero-sum games for 2 players, strategy, gain matrix and modeling
4	Minimax principle and instability in minimax strategies
5	Features of max and min operators, modeling and solving of different game examples
6	Minimax theorem, solution of 2x2 games
7	Geometric solution of 2x2 games
8	Midterm exam
9	Calculation of game value in 2x2 games
10	Examination of 2xm games, solution of nxm games

Week	Weekly Contents
11	Linear programming
12	Iteration method for the solution of $n \times m$ games
13	Introduction to non-zero sum games
14	Nash equilibrium
