G318	Business Analytics	6	3	0	0	3	5

Prerequisites	
Admission Requirements	

Language of Instruction	English
Course Type	Elective
Course Level	Bachelor Degree
Objective	The aim of this course is to equip students with the analytical skills required to make data-driven decisions in business environments. The course introduces key concepts in data science, including descriptive, predictive, and prescriptive analytics, alongside optimization techniques and big data technologies. By integrating real-world examples, business tools, and ethical considerations, the course aims to build analytical literacy and foster strategic thinking in the age of digital transformation.
Content	<p>Week 1 Review on Data and Business Data and AI</p> <p>Week 2 Introduction to Business Analytics and Data Ethics and Assignments of Semester-Beginning Presentations</p> <p>Week 3 Presentation of Semester-Beginning Assignments – Introduction to Excel and Descriptive Analytics (1)</p> <p>Week 4 Descriptive Analytics and Applications (2)</p> <p>Week 5 Predictive Analytics (1)</p> <p>Week 6 Predictive Analytics and Applications (2): Using AI for predictive Analytics</p> <p>Week 7 Wrap-up for midterm exam and Case Studies</p> <p>Week 8 MIDTERM EXAM (Final Project Topics will be provided)</p> <p>Week 9 Prescriptive Analytics (1)</p> <p>Week 10 Prescriptive Analytics and Applications (2)</p> <p>Week 11 Linear Optimization and Decision Analysis</p> <p>Week 12 Nonlinear Optimization and Decision Analysis</p> <p>Week 13 Big Data Technologies and Analytics /course wrap-up and Case Studies</p> <p>Week 14 Final Project Presentations</p>
