Course Code	Course Name	Semester	Theory	Practice	Lab	Credit	ECTS
MAT203	Differential Equations	4	3	2	0	5	8

Prerequisites	
Admission Requirements	

Language of Instruction	French
Course Type	Compulsory
Course Level	Bachelor Degree
Objective	To master: Existence and uniqueness of the solution to ordinary differential equation, Lipschitz condition, second-order linear differential equation, linear system of first-order differential equations.
Content	Existence and uniqueness of the solution to ordinary differential equation, Lipschitz condition, second-order linear differential equation, linear system of first-order differential equations.

Theory Topics

Week	Weekly Contents
1	Cauchy's problem
2	Solution in dimension one
3	Exponentials of matrices
4	Solution in higher dimensions
5	Non-homogeneous equations
6	Cauchy-Lipschitz theorem
7	Dependence on initial conditions, Grönwall's inequality
8	Midterm
9	Qualitative study of autonomus fields
10	Stability and attractivity of an equation
11	Linear differential equations with constant coefficients
12	Non-homogeneous linear differential equations
13	Wronskian
14
