Course Code	Course Name	Semester	Theory	Practice	Lab	Credit	ECTS
MAT232	Algorithms and Advanced Programming II	4	1	1	1	3	3

Prerequisites	
Admission Requirements	

Language of Instruction	French
Course Type	Compulsory
Course Level	Bachelor Degree
Objective	The purpose of this course is to improve students understanding of algorithm design and analysis by studying algorithms working on more complex data structures.
Content	<ol style="list-style-type: none">1. Introduction to object-oriented programming - Basic Concepts2. Trees and tree hopping3. AVL Trees4. Splay Trees5. Max and Min Stack Trees6. MultiWays Tree7. Graphs and Entanglement Algorithms8. Minimum Spanning Tree9. Graph algorithms (shortest path, all pairs shortest path, Djikstra's algorithm)10. Coloring of graphs, matrix representation, conversion between representations in the form of matrices and objects11. Character Sequence Algorithms (search in character sequence, longest common substring)12. Reference behavior, value behavior, shallow/deep copy
