LFR212	Linguistics and Interdiscipl inariy ll	4	3	0	0	3	5

Prerequisites	
Admission Requirements	

Language of Instruction	
Course Type	Compulsory
Course Level	Bachelor Degree
Objective	To provide students with a detailed overview of the various fields of language sciences, beyond general linguistics, emphasizing the diversity of theories and methodologies. To increase the knowledge of fields within applied linguistics by highlighting their diversity. To discuss the growing role of interdisciplinarity in the social sciences in recent years, and thus within the language sciences. To enable students to acquire a richer theoretical and methodological understanding of linguistics.
Content	Theoretical and practical course content is designed to provide a detailed explanation of various fields within the language sciences, such as psycholinguistics, neurolinguistics, language acquisition, generative linguistics, sociolinguistics, and typology; to highlight their practical implications; and to reinforce students' knowledge through oral presentations and other assignments.
