RI-619	International Political Economy	1	3	0	0	3	5

Prerequisites	
Admission Requirements	

Language of Instruction	French
Course Type	Compulsory
Course Level	Masters Degree
Objective	This course aims to examine the most important works of the theorists who form the basis of the conceptual framework of international political economy, or global political economy as it is commonly used today, from a methodological and contextual perspective. Thus, the students will acquire or strengthen the theoretical background and use it in analysing current economic issues.
Content	Publications classified according to theories are analysed by determining the method followed, the assumptions put forward, and the conclusions reached. These studies are prepared as homework in the form of reading notes to be delivered at the end of the semester. Students conduct the theoretical analysis of a current economic issue within the framework of their chosen research topic. This study is prepared as an article that meets scientific criteria. It is presented orally at the end of the semester, and the written version is delivered as a term paper.
