Course Code	Course Name	Semester	Theory	Practice	Lab	Credit	ECTS
IND345	Ergonomics	6	3	0	0	3	4

Prerequisites	
Admission Requirements	

Language of Instruction	French
Course Type	Elective
Course Level	Bachelor Degree
Objective	This course is intended to give an overview of ergonomics and human factors design principles to allow the student to gain an insight into the area of human performance in the workplace.
Content	Introduction to Ergonomics Ergonomics in the Workplace Macro ergonomics and industrial examples The dimensions of macro ergonomics and industrial examples Micro ergonomics and industrial examples The dimensions of micro ergonomics and industrial examples Anthropometry and industrial examples Identify and solve problems of ergonomics in the company Working Study - Time Analysis Ergonomics in the Office Ergonomics in the Construction Sector Ergonomics in the Healthcare Sector

Theory Topics

Week	Weekly Contents
1	Introduction to Ergonomics
2	Ergonomics in the Workplace
3	Macro ergonomics and industrial examples
4	The dimensions of macro ergonomics and industrial examples
5	Micro ergonomics and industrial examples
6	The dimensions of micro ergonomics and industrial examples
7	Midterm
8	Anthropometry and industrial examples
9	Identify and solve problems of ergonomics in the company
10	Working Study - Time Analysis
11	Ergonomics in the Office

Week	Weekly Contents
12	Ergonomics in the Construction Sector
13	Ergonomics in the Healthcare Sector
14	Presentations industrial ergonomics projects made by students
