

## Content

Course Code	Course Name	Semester	Theory	Practice	Lab	Credit	ECTS
INF471-A	Computer Security	7	2	0	2	3	4

Prerequisites	
Admission Requirements	

Language of Instruction	French
Course Type	Compulsory
Course Level	Bachelor Degree
Objective	The aim of this course is to convey information security principles and principles to the students.
Content	Week 1: IIS installation and management, Ftp server installation and management Week 2: IIS and Ftp server security policies Week 3: Network setup and ip management Week 4: DHCP server setup and management Week 5: Arp broadcast attacks and prevention methods Week 6: The way ICMP packages, ping and tracert programs work Week 7: DDOS attacks and prevention methods Week 8: Midterm exam Week 9: DNS server setup and management Week 10: DNS server security policies Week 11: Email server installation and management Week 12: Security measures related to email server Week 13: RAID types, setup and management Week 14: Ethical rules and policies in network management

## Theory Topics

Week	Weekly Contents
1	IIS installation and management, Ftp server installation and management
2	IIS and Ftp server security policies
3	Network setup and ip management
4	DHCP server setup and management
5	Arp broadcast attacks and prevention methods
6	The way ICMP packages, ping and tracert programs work
7	DDOS attacks and prevention methods
8	Midterm exam
9	DNS server setup and management
10	DNS server security policies
11	Email server installation and management

Week	Weekly Contents
12	Security measures related to email server
13	RAID types, setup and management
14	Ethical rules and policies in network management
