## Theory Topics

Week	Weekly Contents
1	The advantages and disadvantages of ERP systems
2	The problems encountered during ERP systems' implementation
3	Transactions in enterprise resource planning systems such as SAP and ORACLE
4	Identification of organizational units with SAP software
5	The material and supplier identification with SAP software
6	Order creation with SAP software, the order fulfillment cycle of products, delivery and billing processes
7	Stock management with SAP software
8	Reporting with SAP software
9	Mid-term exam
10	Cloud computing
11	RFID system and supply chain management
12	Case studies of ERP systems in companies
13	Case studies of ERP systems in companies
14	Case studies of ERP systems in companies
