Course Code	Course Name	Semester	Theory	Practice	Lab	Credit	ECTS
INF204	Electromagnetic Waves	3	3	0	0	3	3

Prerequisites	
Admission Requirements	

Language of Instruction	French
Course Type	Compulsory
Course Level	Bachelor Degree
Objective	To improve the basic knowledge of students on electromagnetism by introducing concepts of electromagnetism in a material medium and the concepts of electromagnetic waves and radiation.
Content	<ol style="list-style-type: none">1. Reminder on electromagnetism2. Maxwell's equations3. Wave equation4. Electromagnetic waves5. Electromagnetic energy6. Electromagnetic field and Maxwell equations in a material medium7. Electromagnetic plane waves in a linear material medium8. Reflection and refraction9. Guided propagation10. Concepts on electromagnetic wave radiation
References	<ol style="list-style-type: none">1. Introduction to Electrodynamics, David J. Griffiths2. Electromagnétisme 2, Jean-Pierre Faroux, Jacques Renault3. Theory Topics

Week	Weekly Contents
1	Necessary mathematical concepts
2	Necessary mathematical concepts
3	Reminder on electromagnetism
4	Maxwell's equations
5	Wave equation
6	Electromagnetic waves
7	Electromagnetic energy
8	Poynting vector
9	Electromagnetic field and Maxwell equations in a material medium
10	Electromagnetic plane waves in a linear material medium
11	Boundary conditions
12	Reflection and refraction
13	Guided propagation
14	Concepts on electromagnetic wave radiation
