| Language of Instruction | French |
| Course Type | Elective |
| Course Level | Bachelor Degree |
| Objective | The course offers micro-economic and game-theoretic analyses of market structure and performance of industries. |
| Content | This course addresses technology issues, such as innovation, research and development, and the effect of the patent system. The last part is devoted to the role of information and marketing and pricing techniques, such as advertising, durability, warranties, two-part tariffs, nonuniform pricing, bundling and tying, and dealerships. |
