Objectif du Cours	<p>L'Administration de design interactif et l'utilisabilité de Web sont les phénomènes populaires dans le processus de communication de marketing. Elle peut être définie comme facilité d'utilisation et d'appréhension, efficacité, et tolérabilité d'erreur d'un site Web et peut être mesurée en se rapportant à ces paramètres. De nos jours, la plupart des sites Web professionnels sont évaluées avant le lancement par des tests d'utilisabilité réalisés avec des utilisateurs et les résultats sont employés pour que des révisions améliorent l'expérience d'utilisateur. Les études récentes exposent que les tests d'utilisabilité peuvent fournir jusqu'à 200 % de la conversion (ROI). Dans ce cours, premièrement les aspects divers du phénomène de Web seront discutés complètement. L'approche d'utilisabilité de Web sera étudiée par des études de cas récentes. Les participants apprendront à analyser et créer les sites Web par les paradigmes et les techniques de l'utilisabilité de Web.</p>
