Dersin Amacı	This class aims at introducing the data mining process to students. This includes the description of data preparation and preprocessing, of various data mining algorithms and of the tools available to assess their results. The class focuses on standard approaches regarding association rules mining, supervised classification and unsupervised classification (clustering). Basic statistical knowledge is necessary to understand the mining algorithms and the quality assessment tools.
İçerik	W1: Introduction, overview W2: Descriptive Statistics W3: Data Preprocessing W4: Inferential Statistics and its preprocessing tools W5: Regression W6: Classification1 W7: Classification2 W8: Exam W9: Clustering1 W10: Clustering2 W11: Association Rule Mining (Apriori and FP-Tree Algorithms)
